Test Connection

DBBalance Ltd.

< Back Next > Cancel

1. Select type of the database you are going to connect with from the list of database vendors.
2. Once database vendor is selected, the bottom area grid will be filled with parameters, relevant to the vendor.
3. Fill out the values for parameters in the grid (like Server and Database name, Username and Password) according your local database.
4. For database specific parameters, contact your DBA if needed.
5. Use Test Connection button to check the supplied parameters.
6. Press the Next button to proceed.
