

## Opening a Workspace

- Select **File > Open Workspace** command from the main menu.
- Select and open "DEMO Workspace.cdb" file

The program will open workspace "DEMO Workspace" (see *Figure 2*):

*Figure 2:* View of the DEMO Workspace

After the workspace has been opened, the application window will be divided into two identical parts (left and right) that each contain the same set of database connections (see *Figure 2*).
